# What we offer

## 1

### Passive indexation

- Track equity and fixed income indices with minimal tracking error.
- Replicate indices across a range of global, regional and local markets through full replication, optimisation or sampling.
- Voting and engagement.

## 2

### Evolve indexation

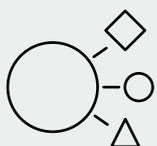

- Track customised equity and fixed income indices.
- Design proprietary indices to deliver enhanced sustainability outcomes, while maintaining a risk and return profile similar to the parent index.
- Voting and engagement.

## 3

### Enhanced indexation

- Tilt market-cap indices towards multiple risk factors, such as value, quality and momentum.
- Target index outperformance over the long term, while keeping tracking error under control (typically 75-150 bps) and applying index constraints.
- Voting and engagement.

## Why choose us?

**30 building blocks to choose from**

We offer a full range of equity and fixed income strategies across local, regional and global markets.

Cost-effective and risk-controlled implementation enables investors to meet their goals.

**Sustainability**

We integrate ESG considerations into our process. We implement active engagement and use our voting rights to drive positive change.

**Experience**

Clients benefit from the expertise of a stable investment team, with a demonstrable track record since 2005.

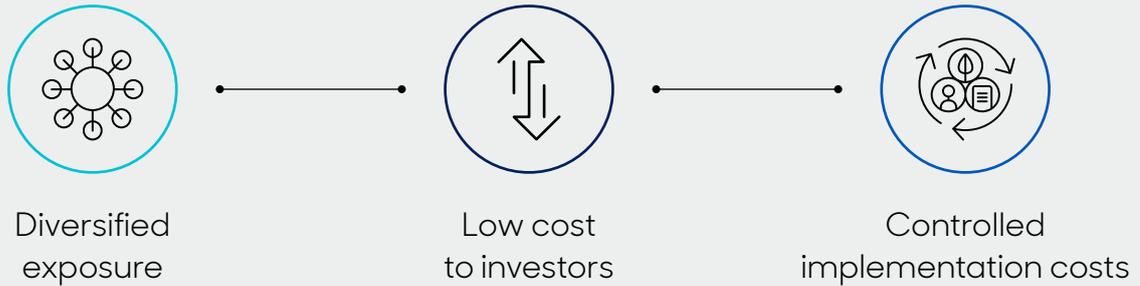

# Passive indexation

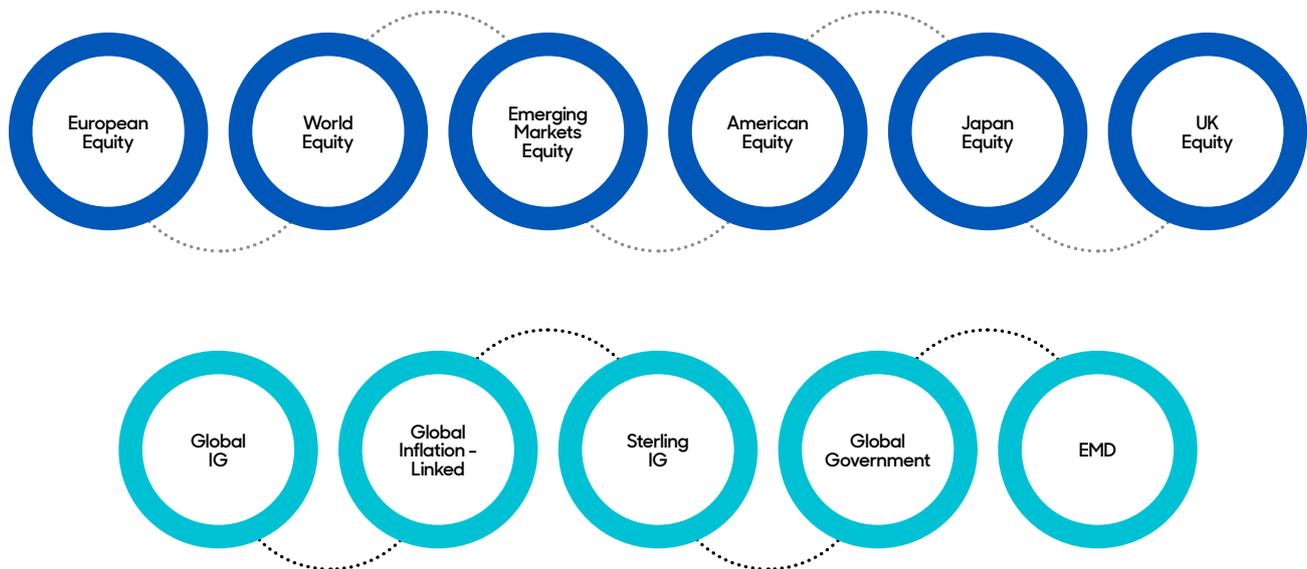

## Replicating the risk and return profile of market indices in the most cost-efficient way

- Simple, transparent and cost-effective approach to equity and fixed income investing.
- Voting across all our equity portfolios and active stewardship that is supported by our central sustainability team.

### Key benefits of passive indexation:

### Our range of passive strategies cover:

The above strategies are provided to illustrate our range of capabilities only and may not be available in all jurisdictions.

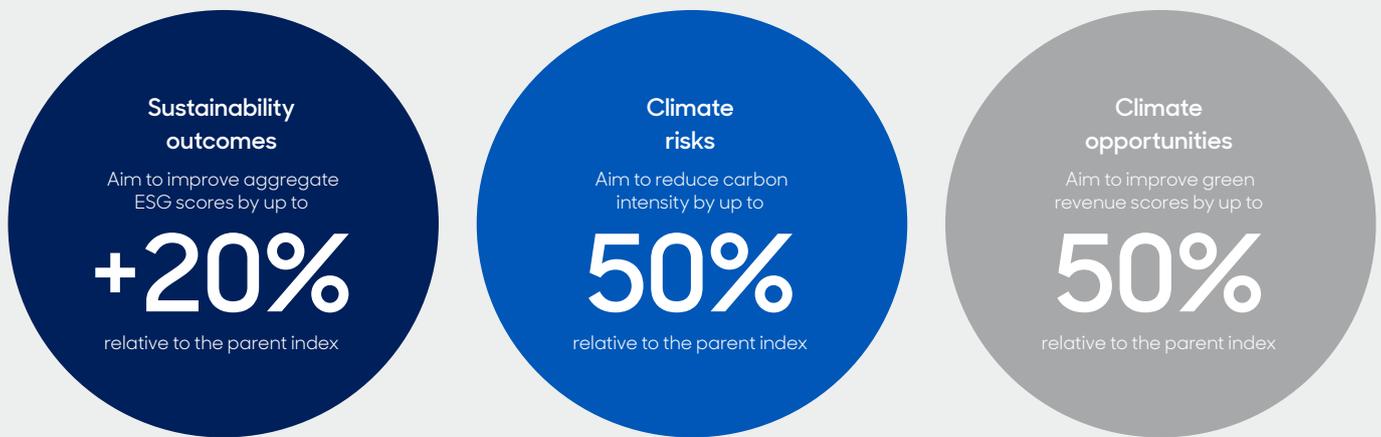

# Evolve indexation

## Balancing long-term financial returns with sustainable improvements

- We aim to generate long-term returns by replicating the risk and return profile of customised indices with sustainable improvements.
- We have designed customised proprietary indices in partnership with the calculation agent MSCI – a global leader in index design, ESG (environmental, social and governance) data and analytics.
- Aberdeen Investments indices focus on minimising the long-term risks associated with ESG concerns. They also leverage opportunities arising from the transition to cleaner technologies.
- Partnership with the calculation agent MSCI, a global leader in index design and provision of ESG data and analytics.

# Enhanced indexation

## A factor-driven strategy that goes beyond traditional indexation

### What is enhanced indexing?

Enhanced indexing applies a multi-factor approach to an index portfolio. It tilts its constituents towards specific risk factors – such as quality, value and momentum – to achieve above-benchmark returns over the long term. This is a systematic, rules-based strategy that relies on proprietary risk factors.

## Our approach

**Systematic** – apply a systematic approach to investment

**Diversified** – focus on multiple enhanced risk factors

**Dynamic** – apply proprietary definition of risk factors

**Cost-effective** – provide cost-efficient access to regional and global equity markets
